

About the virtual classroom:

This instructor-led class is delivered via NW3C's live online training classroom. You will use your own computer to interact live with the instructors and with each other. To get the most out of the class, the following requirements and recommendations apply:

Devices	Desktop or laptop computer (required): you will be prompted to install a browser plugin or add-on when you join the training session.
	Mobile device (not permitted): you will be prompted to install an app when you join the training session.
Speakers and microphone (required)	You will not be able to complete the course without the ability to talk with and listen to the instructors and your fellow students. Headphones are recommended, but built-in or external speakers can also be used.
Camera	The live online classroom training experience could be enhanced when students can see each other.
Connection	A direct internet connection is recommended, though you should still be able to join the training session via a wireless connection.
Environment	Join the training session from a quiet location. Do your best to minimize background noise and distractions.
Display	Consider connecting a second monitor (recommended) so that you can complete hands-on practical exercises or view documents without minimizing the training session window.
